June 19th.1947.

Dear Mr. Francis,

Thank you for your letter and your kind message to father and mother. They have been with me nearly a fortnight and have had a very good time going to theatres and getting around generally. I shall miss them very much when they go back to Cardiff on Saturday.

I still have a great affection for Brecon although I come there very occasionally now, but I felt I must try to help a Brecon boy, especially as I knew to whom he belonged when you wrote.

I had a talk yesterday with Mr. Sursham, our Manager this side of the Anglo-Newfoundland Company and he pointed out to me that we could not say here in London that your boy could be given a job while he is in Newfoundland as it is a bit beyond our control. But he did suggest that when we give him a letter of introduction (as soon as you let me know that his plans are completed for his departure) we could add a note to the effect that if they could make use of him in any way it would be much appreciated this end. Is your son intending to go to St. John's or straight to Grand Falls as that is where our Mills are and St. John's is about 300 miles away? Perhaps you would let me know and I assure you I will help you in any way I can. Your son has chosen a very interesting career and I am sure you must be proud to know he has done so well in his work.

Yours/sincerely,

Queenie Davies.
